

SA EMERGING MARKETS VALUE FUND

Select

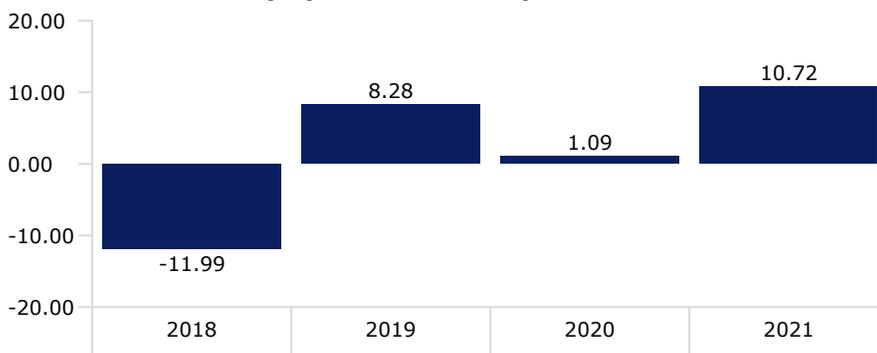

As of 6/30/2022

The Fund's goal is to achieve long-term capital appreciation. The Fund pursues its goal by generally investing in a broad and diverse group of equity securities of companies in emerging markets, which may include frontier markets (i.e., emerging market countries in an earlier stage of development). The Fund intends to purchase securities of companies with small, medium and large market capitalizations in their respective markets that the Sub-Adviser considers to be "value" stocks at the time of investment. The Fund seeks to achieve its goal by investing in companies in countries designated by the Investment Committee of the Sub-Adviser from time to time as approved markets. The Fund is authorized to invest in the following approved markets: Brazil, Chile, China (including China-A shares which are equity securities of companies listed in China, accessible through the Stock Connect program that connects mainland China markets with the Hong Kong Stock Exchange), Colombia, the Czech Republic, Greece, Hungary, India, Indonesia, Malaysia, Mexico, the Philippines, Poland, Russia, Saudi Arabia, South Africa, South Korea, Taiwan, Thailand, Turkey, and the United Arab Emirates. The Sub-Adviser may authorize other countries for investment in the future in addition to the approved markets listed above. In addition, the Fund may also continue to hold securities associated with countries that are not listed above as approved markets but had been authorized for investment in the past and may reinvest distributions received in connection with such existing investments in such previously approved countries. As a non-fundamental policy, under normal circumstances, the Fund will invest at least 80% of its net assets in emerging markets investments that are approved market securities.

Investing involves risk, principal loss is possible. Investing in foreign and emerging market securities may involve certain additional risks, including exchange rate fluctuations, less liquidity, greater volatility and less regulation. Small company stocks may be subject to a higher degree of market risk than the securities of more established companies because they tend to be more volatile and less liquid.

Effective April 1, 2022, the Fund's primary benchmark changed from the MSCI EM Value Index to the SA Emerging Markets Value Benchmark Index.

**The SA Emerging Markets Value Benchmark is composed of the Morningstar® Emerging Markets IndexSM before 6/20/2008 and the Morningstar® Emerging Markets Value Target Market Exposure IndexSM after 6/20/2008.

The Morningstar® Emerging Markets IndexSM selects stocks traded in emerging markets around the globe. Morningstar defines emerging markets as those countries not considered developed markets, but also meeting a minimum level of economic activity set by Morningstar. The Index is measured in U.S. dollars and is calculated on a total return basis assuming the reinvestment of dividends after deduction of the local withholding tax that is withheld to non-resident individuals who do not benefit from double taxation treaties.

The Morningstar® Emerging Markets Value Target Market Exposure IndexSM contains the cheaper half of the Morningstar® Emerging Markets Target Market Exposure IndexSM, with "cheaper" being defined by Morningstar's style score. The Index selects those securities that are in the 85% of stocks with the largest market capitalization in each country (which Morningstar considers to be the large and mid-cap universe). Morningstar defines emerging markets as those countries not considered developed markets, but also meeting a minimum level of economic activity set by Morningstar. The Index is measured in U.S. dollars and is calculated on a total return basis assuming the reinvestment of dividends after deduction of the local withholding tax that is withheld to non-resident individuals who do not benefit from double taxation treaties.

The MSCI Emerging Markets Value Index (MSCI EM Value NR USD) is a market capitalization weighted equity index comprised of companies within the MSCI Emerging Markets Index having value characteristics, such as low market-to-book ratios. This index is unmanaged and reflects reinvested dividends and/or distributions, but does not reflect sales charges, commissions, expenses or taxes.
