 "Three Year", "Five Year", "Ten Year" and "Since Inception" returns have been annualized.

The performance data quoted represents past performance. Past performance does not guarantee future results and principal value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance may be lower or higher than the performance information quoted. Investing involves risks, including the loss of principal. Returns listed assume reinvestment of all dividend and capital gain distributions; they do not include the effect of any fees charged by an investment advisor or other service provider to an individual account. Current performance may be lower or higher than the performance data quoted. For performance data current to the most recent month-end, please call (844) 366-0905 or visit sa-funds.com.

Returns listed assume reinvestment of all dividend and capital gain distributions; they do not reflect the deduction of any fees charged by an independent investment advisor or other service provider to an individual account. Such fee, if taken into consideration, will reduce the performance quoted above.

Investors cannot invest directly in an index. Indexes are unmanaged and reflect reinvested dividends and/or distributions, but do not reflect sales charges, commissions, expenses or taxes.

Stock investing involves risk including loss of principal. Securities of small companies are often less liquid than those of large companies. As a result, small company stocks may fluctuate relatively more in price. International and emerging market investing involves special risks such as currency fluctuation and political instability, and may not be suitable for all investors. Bonds (fixed income) are subject to market and interest rate risk if sold prior to maturity. Bond values will decline as interest rate rises, issuer's creditworthiness declines, and are subject to availability and changes in price. REIT investments are subject to changes in economic conditions and real estate values, and credit and interest rate risks.

International and emerging market investing involves special risks such as currency fluctuation and political instability, and may not be suitable for all investors.

Bonds (fixed income) are subject to market and interest rate risk if sold prior to maturity. Bond values will decline as interest rate rises, issuer's creditworthiness declines, and are subject to availability and changes in price.

REIT investments are subject to changes in economic conditions and real estate values, and credit and interest rate risks.
